PROFILE

I am a highly skilled and results-oriented Software Engineer with a robust background in full-stack development, specializing in the MERN stack. Proven ability to design, develop, and deploy scalable applications for diverse sectors. I am an expert in leveraging technologies such as Node.js, Express, MongoDB, and the React ecosystem (React.js, Next.js, React Native) to deliver successful, high-quality projects.

WORK EXPERIENCE

2024 - PRESENT

Ilorin, Kwara State, Nigeria

Fluenttra Limited

- Part of the development team for two major commercial platforms: Terrachow and 360gadgetsafica.
- Terrachow (B2C Food Delivery Logistics App): Implemented and deployed the user-facing mobile app version of the platform
- 360gadgetsafica (E-commerce App): Part of the fullstack development team for the e-commerce platform, managing authentication, product catalogs, checkout process and more.

2023 - 2024

Remote

Freelance

- Proffyemphy's Ideal Academy (E-Learning Platform): Created the full-stack platform, enabling student learning and communication with tutors.
- TaashAM (Freelance Platform): Developed the entire Saudi-based application from scratch to connect event planners with clients.
- Synapse AI: Developed the complete fullstack features of the AI powered learning assistant.
